CARBON REDUCTION PLAN GUIDANCE

Notes for Completion

Where an In-Scope Organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required at the selection stage to submit a Carbon Reduction Plan which details their organisational carbon footprint and confirms their commitment to achieving Net Zero by 2050.

Carbon Reduction Plans are to be completed by the bidding supplier¹ and must meet the reporting requirements set out in supporting guidance, and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve Net Zero emissions by 2050.

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a Carbon Reduction Plan covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard² and Guidance³, and all of the following criteria are met:

- The bidding entity is wholly owned by the parent;
- The commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity;
- The environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract; and
- The CRP is published on the bidding entity's website.

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's Carbon Reduction Plan may only be a temporary measure under this selection criterion.

The Carbon Reduction Plan should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the key objectives of the Carbon Reduction Plan within their strategic plans.

A template for the Carbon Reduction Plan is set out below. Please complete and publish your Carbon Reduction Plan in accordance with the reporting standard published alongside this PPN.

¹ Bidding supplier or 'bidding entity' means the organisation with whom the contracting authority will enter into a contract if it is successful.

Carbon Reduction Plan Template

Supplier name:Goaco Group Ltd.....

Publication date:May 2023.....

Commitment to achieving Net Zero

Goaco Group is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations.	
Baselines for energy consumption and emissions were started in 2020, therefore these baselines will guide future targets and energy performance indicators. We now have 12 months' worth of comparable data (Dec 2020 to Dec 2021). Baselines have been set for energy used in our HQ and fuel usage.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	6.37
Scope 2	7.50
Scope 3 (Included Sources)	Not currently assessed, on-going work to generate accurate figures will be completed and emissions available in 2024.
Total Emissions	13.87

Current Emissions Reporting

Reporting Year: 2022	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	6.37
Scope 2	7.50
Scope 3 (Included Sources)	Not currently assessed, due to the high volume of vehicles using our equipment. On-going work to generate accurate figures will be completed and emissions available in 2024.
Total Emissions	13.87

Emissions reduction targets

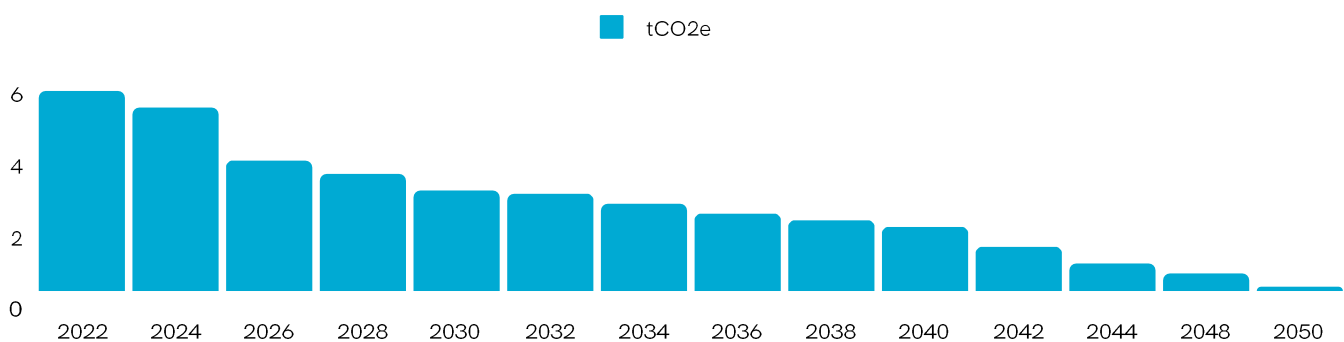

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

Below 5.0 tCO₂e by 2030 (or sooner)

Below 2.0 tCO₂e by 2040 (or sooner)

Below 0.1 / Net Zero by 2050 (or sooner)

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects & Initiatives

Completed Carbon Reduction Initiatives

Goaco has now been successfully certified by a UKAS-accredited body to ISO 14001 (Oct 2022).

Conversion to all electric business fleet will begin in 2024.

Consideration being given to achieving ISO 50001.

Ongoing review of current office facilities, discussions with landlord planned for further energy improvements (including greener energy provider).

Reduction in business travel and enhanced IT support to allow for 90% remote working by 2024.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
